Experience

Network Automation Engineer, Orange Labs — *Châtillon, France*

Automated Defense System for Cybersecurity - Network Cybersecurity and Privacy — *November 2018 - Present*

I contribute to research activities on Event Driven Network Automation (EDNA), an IA based Automation paradigm for IP Networks Security and Quality. I anticipate operational needs, assess feasibility, design algorithms and implement tools and simulators.

Research Engineer Intern, Orange Labs — *Châtillon, France*

Event-Driven Network Automation Solution - IP Networks, Monitoring and Security Department — *2018 (6 months)*

In charge of investigating the feasibility of automating two scenarios for day-to-day realistic BGP events, namely BGP hijacking and load balancing.

Research Intern, IMT Atlantique — *Brest, France*

BGP, OSPF and SDN Simulation Development - Computer Sciences (INFO) Department — *2017 (3 months)*

- Network design and implementation of BGP and OSPF protocols, and an SDN approach using Python and Quagga.
- Conception and implementation of BGP hijacking emulations, by using Python and Quagga, to help depict how the BGP protocol operates.

Research Assistant, District University of Bogota — *Bogota, Colombia*

TDM-WDM Optical Networks and Wired-Wireless Convergence - GRECO Research Group — *2014 (5 months)*

- Study the state of the art and propose a technology roadmap.
- Two articles were published from this project.

Education

Orange Labs - Télécom SudParis — *France*

Doctoral Research — *November 2018 - Present*

Theses topic: Automated Defense Systems for Cybersecurity

IMT Atlantique — *France*

Master in Information Technologies — *September 2016 - September 2018*

Specialty: Communication network engineer

District University of Bogota — *Bogota, Colombia*

Bachelor Degree in Electronics (5 years) — *February 2010 - December 2015*

Specialty: Computer networks

Skills

Programming	Python, Go
Virtualization	Docker, Vagrant, VirtualBox, VMware
Network protocols	TCP/IP, BGP, OSPF, IS-IS
Network orchestration	Salt, Ansible, Napalm, Junos
Computer Science	Deep Learning, Reinforcement Learning
Operating systems	Linux (Ubuntu), Linux (Debian), Windows
Software and tools	GitHub, GitLab, VS Code

Languages

Spanish	Mother tongue
English	Advanced (C1)
French	Intermediate level (C1 - DALF certificate)

Interests

Reading, Running, Biking, Photographie
